

A CV tells your past. Njia helps choose your next step.

A career coach that asks before it advises,
then matches you to jobs you can apply for.

THE LEARNER'S THREE QUESTIONS

01 What can I already show?

Njia asks follow-ups, then links strengths to CV evidence.

02 Which jobs can I apply for now?

Live postings with a skill-match %, not hiring odds.

03 Am I ready for the interview?

Real reported questions, typed practice and AI feedback.

W

ILLUSTRATIVE PERSONA

Wanjiru
Nairobi · aspiring data
analyst

Has project experience.
Unsure which roles fit
and how to prepare.

Ask first. Then match and practise.

Follow-up questions, an evidence-linked brief, live job matches and interview practice.

Illustrative, hand-authored example. Rewrites are checked for numbers/tools and still need human factual review.

BEFORE / CV LINE + YOUR ANSWER

“Cleaned sales data in Excel and made weekly charts.”

Your answer: “Managers used them in Monday stock reviews.”

AFTER / USES YOUR ANSWER — VERIFY

“Prepared weekly Excel sales charts from cleaned data for managers’ Monday stock reviews.”

Same facts plus the learner's own answer. Nothing invented.

01 / Ask

Skill + outcome follow-ups reshape skills and the brief.

02 / Match

Live jobs you can apply for, with matched + missing skills.

03 / Practise

Sourced questions + AI feedback; send the 7-day plan to WhatsApp.

Better priorities start with local context.

Historical skill mentions inform the advice; the language model does not invent demand figures.

18,371
